Agenda

1. Demanding environment
2. European business supports Swiss production
3. Financial results
4. Disposal of Engineering Services & Focus on core business
5. Outlook
6. Questions and answers
Power production impacted by low wholesale prices and currency effects

**SNB decision from 2015 has negative currency effect with a time lapse**
As expected, consequences of the decision to discontinue the minimum EUR exchange rate 2015 evident in 2017
Ø hedging rate
2015: CHF 1.19/EUR
2016: CHF 1.19/EUR
2017: CHF 1.04/EUR

**Drop in wholesale prices leads to lower hedge level**
Ø hedge level
2015: EUR 54/MWh
2016: EUR 47/MWh
2017: EUR 44/MWh

**Forward prices at low level in short/medium term**
Ø forward prices from 2019 to 2021:
- EUR 37/MWh (CAL Base DE)
- EUR 41/MWh (CAL Base CH)

**Forward prices as at reporting date 30 Jun 2017**
Ø forward prices from 2019 to 2021:
- EUR 29/MWh (CAL Base DE)
- EUR 34/MWh (CAL Base CH)

Alpiq hedges energy and currency in advance on a rolling two- to three-year basis on average

Alpiq Holding Ltd. Financial Analyst Conference 2018
Asymmetry on the Swiss electricity market distorts competition

Power production operating at a loss in the partially liberated Swiss market

End customer price (household) in regulated Swiss market (including grid and compensatory feed-in remuneration)

1 ElCom (2017), median values
2 Swisselectric
3 Gösgen and Leibstadt nuclear power plants five-year average with long-term fund performance
4 Cal-17 Baseload CH (average from 1 Jan 2016 to 31 Dec 2016)
European business supports Swiss production

- Alpiq increases net revenue to CHF 7.2 billion
- EBITDA before exceptional items of CHF 301 million

- Net debt reduced from CHF 0.9 billion to CHF 0.7 billion
- Liquidity of CHF 1.4 billion at sound level

- International energy business generates more than 60% of earnings
- Swiss business impacted by wholesale prices and currency effects

- Spin-off and sale of the industrial business creates added value and strengthens core business
- No more net debt thanks to sales proceeds of CHF 850 million
Results of operations before exceptional items (EI)

- Higher net revenue mainly attributable to trading and sales activities in Market France
- As announced, EBITDA of CHF 301 million down on the previous year
- Operating Cash Flow significantly improved, i.a. due to active capital management
- Net debt reduction of CHF 142 million compared to the end of 2016
Increased contribution from thermal production and RES

Stronger results from international production

Negative exchange rate effects caused by expiring hedges, wholesale prices below production costs
Financing mix as at 31 December 2017
Degree of centralisation remains high

- The capital market remains the most important source of financing
- The structural subordination of the Alpiq Holding Ltd. remains on a low level
- Non-utilised committed credit lines of around CHF 400 million
Financial liabilities
Debt situation improved significantly

- Net debt further reduced by CHF 142 million to CHF 714 million
- Net debt/EBITDA before exceptional items of 2.4
Development debt situation after closing of the transaction

- Sales proceeds for InTec and Kraftanlagen Group of CHF 850 million
- Net debt becomes Net liquidity of CHF 136 million based on 2017 pro-forma and subject to closing accounts
Balance Sheet remains stable
Alpiq with sound liquidity and stable equity

- **Sound liquidity:** CHF 1.4 billion
- **Stable equity:** CHF 4.0 billion
- **Equity ratio at 38.9%**
Tax audit in Romania

• Assessment of Alpiq Energy SE, Prague, issued by Romanian tax authority ANAF in the amount of RON 793 million (CHF 199 million) for the period of 2010 to 2014

• Alpiq has contested on account of its reasoning and the extent of the amount assessed

• Alpiq currently deems it unlikely that this assessment will result in a negative outcome for the company

➢ No liability (provision) of RON 793 million recognised; secured by a bank guarantee in the amount of CHF 202 million; disclosed under non-current term deposits
Stringent cost and balance sheet management to continue

Alpiq focuses on the core business
2018 remains challenging

- Low wholesale prices continue to put Swiss production under pressure
- Slight relief for Swiss hydropower through market premium
- International energy business generates positive contributions to support Swiss production
Recovery on the horizon in the medium to long term

Slightly positive development on the markets
- Marginal recovery in electricity and CO\textsubscript{2} prices
- Positive effect from CHF/EUR exchange rate with a time lapse

Policy-makers recognise need for action
- Full liberalisation of the electricity market would correct market asymmetry
- New market model and water tax regulations would make it possible to operate economically with hydropower
- EU electricity accord would secure international market access for hydropower
Development prices from beg 2018 to June 2018 (in CHF/MWh)
Alpiq is fit for the future

- Successful divestment creates significant added value for the Group
- No more net debt thanks to sale proceeds of CHF 850 million
- Focus on core business: Generation Switzerland, Digital & Commerce, international thermal production, new renewable energies
- Positive developments on markets (electricity/CO₂ prices) and regarding regulation (hydropower) in the medium/long term
- Opportunities in the areas of decarbonisation, decentralisation and digitalisation

Disclaimer

This communication contains, among other things, forward-looking statements and information. Such statements include, but are not limited to, statements regarding management objectives, business profit trends, profit margins, costs, returns on equity, risk management or the competitive environment, all of which are inherently speculative in nature. Terms such as "anticipate," "assume," "aim," "goals," "projects," "intend," "plan," "believe," "try," "estimate," and variations of such terms, and similar expressions have the purpose of clarifying forward-looking statements. These statements are based on our current estimates and assumptions, and are therefore to some extent subject to risks and uncertainties. Therefore, Alpiq’s actual results may differ materially from, and substantially contradict, forward-looking statements made expressly or implicitly. Factors contributing to or likely to cause such divergent outcomes include, but are not limited to, the general economic situation, competition with other companies, the effects and risks of new technologies, the Company’s ongoing capital needs, financing costs, delays in integrating mergers or acquisitions, changes in operating expenses, currency fluctuations, changes in the regulatory environment on the domestic and foreign energy markets, oil price and margin fluctuations for Alpiq products, attracting and retaining qualified employees, political risks in countries where the Company operates, changes in applicable law, the realisation of synergies and other factors mentioned in this communication.

Should one or more of these risks, uncertainties or other factors materialise, or should any of the underlying assumptions or expectations prove incorrect, the results may differ materially from those stated. In light of these risks, uncertainties or other factors, the reader should not rely on such forward-looking statements. The Company does not assume any obligation beyond those arising out of law to update or revise such forward-looking statements, or to adapt them to future events or developments. The Company points out that past results are not meaningful in terms of future results. It should also be noted that interim results are not necessarily indicative of the year-end results.

This communication is neither an offer nor an invitation to sell or buy securities.
